# MarketPulse Team

Copy this file to `TEAM.md` in your team repository and complete it before starting collaborative work.

## Course

- Module: MESIFI472326 - Python, Git, Linux
- TD Group: G07
- MarketPulse Team: TMermaids

## Members

Full name | GitHub username
Student 1 | @OUIOUIOUINON
Student 2 | @daniilvedishchev

Add a fourth row only if your team has four members.

## Repository

- Team repository: `esilv-marketpulse-gXX-tYY`
- Upstream repository: `tawounfouet/esilv-marketpulse`

## Market choice

The common starter uses:

- Instrument: AAPL - Apple Inc.
- Benchmark: S&P 500

If your teaching instructions allow a different pair later, record it here:

- Instrument:
- Benchmark:

## Working agreement

Our team agrees to follow these rules:

- each student uses their own GitHub account;
- each student produces identifiable commits;
- feature work is performed on branches;
- Pull Requests are used before merge once introduced in the labs;
- another team member reviews Pull Requests once code review is introduced;
- no student shares GitHub credentials;
- no secrets are committed to the repository;
- each student keeps their checkpoint evidence under their own GitHub username.

## Privacy

Do not add:

- personal email addresses;
- student identification numbers;
- phone numbers;
- home addresses;
- passwords;
- access tokens;
- private keys;
- cloud billing information.
```

Collaborator
J'ai ajouté l'affichage du marché et de la devise pour Apple et pour le S&P 500.
Pourquoi : le résumé dans le terminal est plus clair, on voit directement sur quel marché et dans quelle devise se trouve chaque série.
Comment j'ai vérifié : j'ai lancé python src/main.py, les lignes Market et Currency s'affichent bien pour les deux, et seul le fichier src/main.py a été modifié.
feat: display market metadata

TD6

PARTIE 1

Une relecture de code (code review) sert à vérifier un changement avant de l'ajouter au main de l'équipe. Elle permet de repérer des erreurs de garder un code cohérent et de partager la compréhension du projet. Le relecteur ne refait pas la fonctionnalité : il vérifie que le changement est compréhensible, utile, limité à ce qui était prévu, et qu'il ne casse rien.

Partie 2
Nous sommes deux dans l'équipe. Je relis la Pull Request de mon binôme (amélioration de la documentation), et mon binôme relit la mienne (affichage du marché et de la devise). Personne ne relit sa propre Pull Request.

Partie 3

daniilvedishchev commented 7 minutes ago • edited

What changed

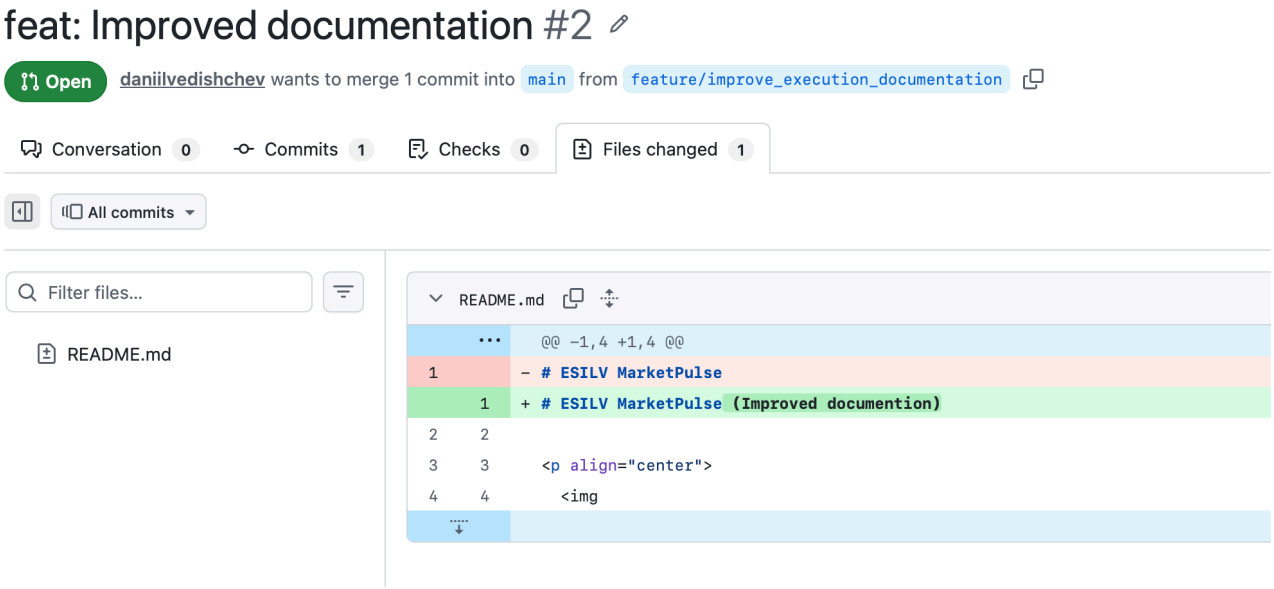

- display market metadata for the instrument and benchmark.

Why

The terminal summary should provide clearer context about each market series.

Validation

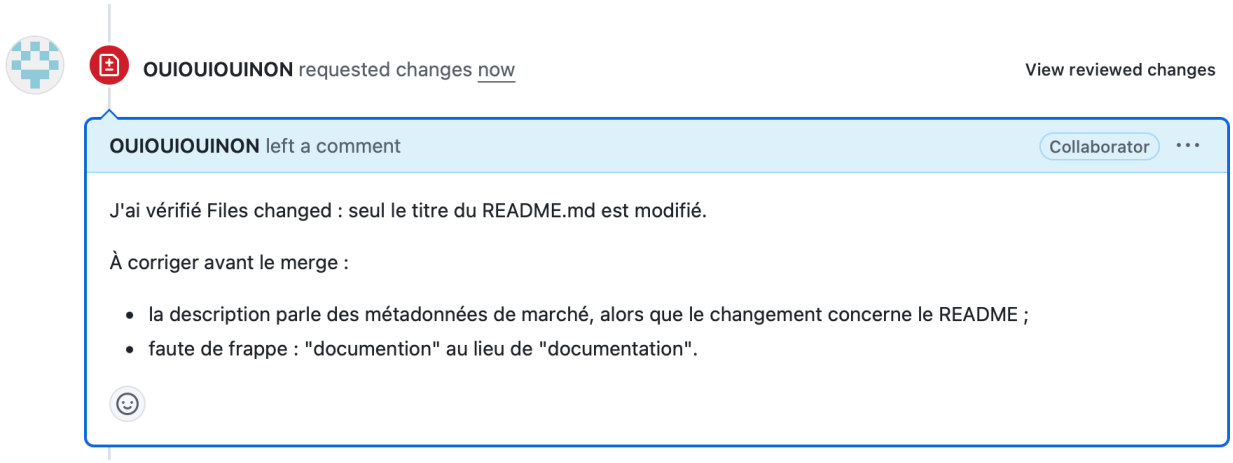

- ran `python src/main.py`;
- inspected the terminal output;
- verified no unrelated change is included.

Partie 5

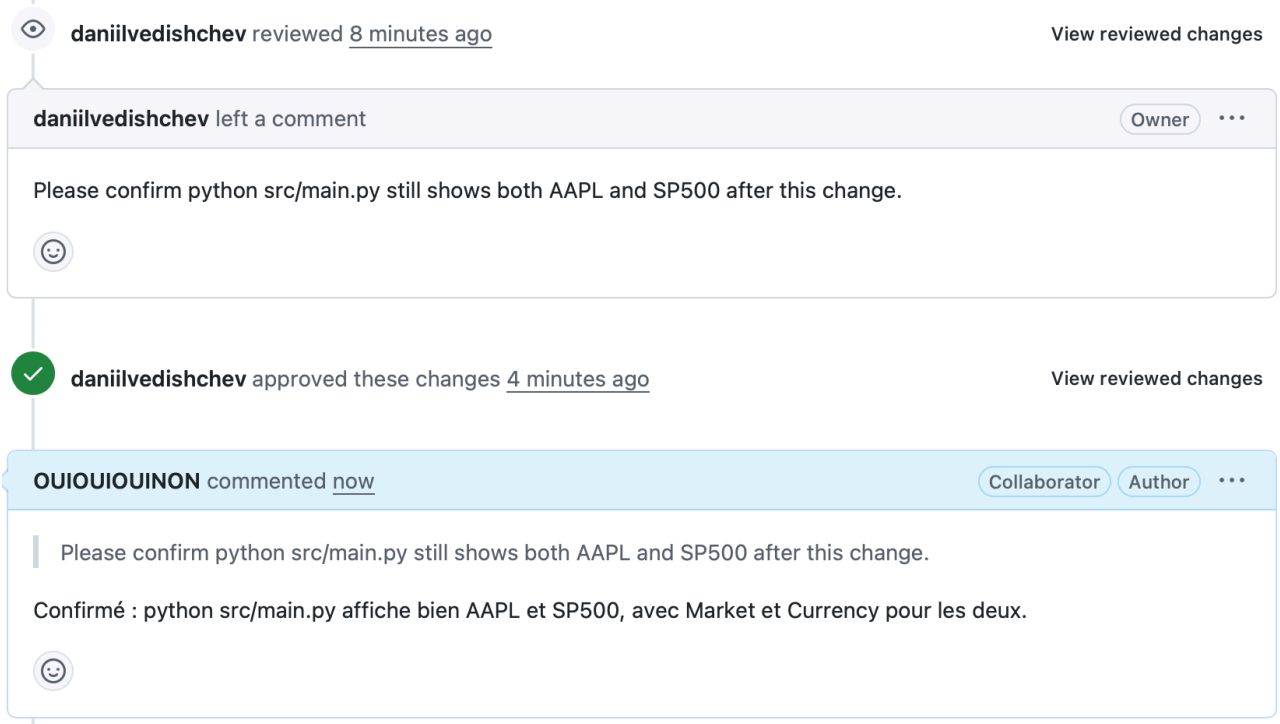

La Pull Request #2 de mon binôme propose d'améliorer la documentation. Elle va de feature/improve_execution_documentation vers main et ne modifie qu'un seul fichier : README.md. Le changement se limite au titre du README. La description ne correspond pas au changement : elle parle d'afficher les métadonnées de marché, alors que seul le titre du README a été modifié. Le titre contient aussi une faute de frappe (« documention").

PARTIE 6

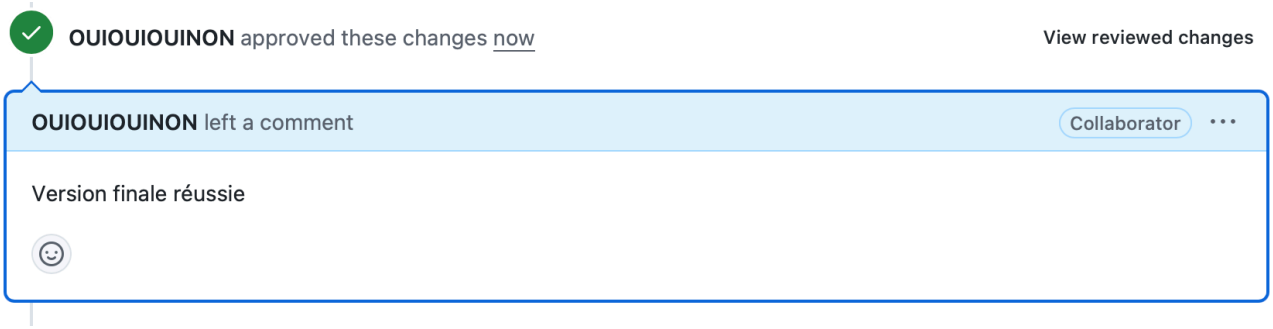

PARTIE 7

Sur ma Pull Request #1, mon binôme n'a trouvé aucun problème bloquant : il m'a seulement demandé de confirmer que python src/main.py affiche toujours AAPL et SP500. J'ai confirmé, puis il a approuvé. Aucune correction n'était nécessaire, donc je n'ai pas ajouté de commit de

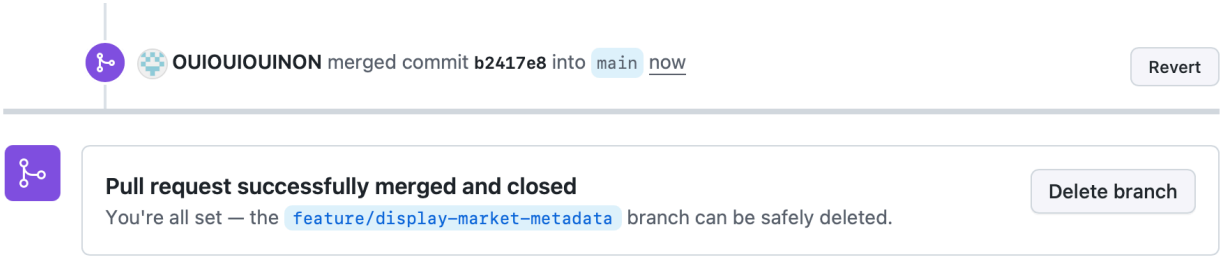

PARTIE 8

J'ai vérifié la correction : la faute de frappe est corrigée et la description correspond maintenant au changement du README. Les deux points de ma relecture sont réglés.

PARTIE 9

Après l'approbation de mon binôme, j'ai fusionné ma Pull Request #1 dans le main de l'équipe. Son statut est maintenant Merged : l'affichage du marché et de la devise fait partie du main commun.

Après les merges, j'ai mis à jour mon main local avec git pull. Il est identique au main de l'équipe (b2417e8) et contient les deux Pull Requests fusionnées : la mienne et celle de mon binôme (#2). MarketPulse fonctionne toujours.

Sur ma Pull Request, aucune correction n'était nécessaire : mon binôme n'a trouvé aucun problème bloquant, il a seulement demandé une confirmation avant d'approuver. Sur la sienne, j'ai demandé des corrections car la description ne correspondait pas au changement et le titre contenait une faute de frappe. Il les a corrigées dans un commit "fix" sur la même branche, ce qui a mis à jour la même Pull Request.
